

THUMBETI KARTHIK KUMAR

☎ +91 8466901880 | ✉ karthikthumbeti@gmail.com

PROFESSIONAL SUMMARY

Cybersecurity Intern with hands-on experience in application security, penetration testing, and vulnerability assessment across web, API, mobile, and network environments. Proficient in identifying and validating vulnerabilities aligned with OWASP Top 10, SANS Top 25, and CWE standards. Additionally experienced in backend development using Golang and PostgreSQL, with exposure to DevOps practices and CI/CD pipelines. Analytical problem-solver who stays current with evolving threats and security best practices.

TECHNICAL SKILLS

Programming Languages: Go (Golang), Python, Bash

Backend & Databases: REST API Development & Security, PostgreSQL

Application & API Security: Authentication, Authorization, IDOR, Rate Limiting, SAST & DAST

Security Tools: Burp Suite, Nmap, Nessus, OpenVAS, OWASP ZAP, SQLmap, Checkmarx, John the Ripper

Security Methodologies: OWASP Top 10, SANS Top 25, CWE, Risk Assessment, Social Engineering

Operating Systems: Windows, Ubuntu, Kali Linux, Parrot OS

Network & Infrastructure: Firewalls, LAN/WAN, TCP/IP Suite, Routing & Switching Protocols

PROFESSIONAL EXPERIENCE

MoxieHawk Private Limited | Hyderabad, India

Jul 2025 – Jan 2026

Jr. Application Security Intern

- Performed Web, Network, Mobile (Android), and API Penetration Testing; documented findings with severity ratings and remediation plans aligned with **OWASP Top 10** and **SANS Top 25**.
- Conducted manual and automated vulnerability assessments using **Kali Linux** and **Checkmarx** (SAST) to identify misconfigurations, security loopholes, and compliance gaps throughout the SDLC.
- Performed **Firewall, Router & Switch Security Analysis** to identify misconfigurations and strengthen the overall network security posture.
- Conducted authenticated vulnerability assessments across **Windows** and **Linux** environments, identifying unpatched vulnerabilities and weak configurations.
- Designed and developed RESTful APIs using **Go (Golang)** for internal and client-facing applications, including **HyperPay** payment gateway integration with secure authentication and validation.
- Developed a customized **CRM** and **CMS** with role-based access control and secure data handling to meet client business requirements.
- Assisted with DevOps setup and **CI/CD** pipelines — automating build, test, and deployment workflows while integrating basic security checks and supporting infrastructure cost optimization.

DigiQuanta | Hyderabad, India

Sep 2024 – Mar 2025

CyberSecurity Intern

- Conducted **Web Application Penetration Testing** and prepared detailed vulnerability assessment reports with findings and remediation recommendations.
- Identified High, Medium, and Low severity vulnerabilities based on **OWASP Top 10**, Offensive Vulnerabilities, and **CWE**; prioritized findings by criticality and business impact.
- Utilized **Nessus** and **OWASP ZAP** for automated security configuration audits, and used **Burp Suite** daily for manual assessments.
- Reviewed **Python** applications for common security flaws, supporting secure development practices within the team.

PROJECTS

- PentSecOps — A Vulnerability Management Dashboard**2025
- Built a full-stack pentesting and vulnerability management platform with role-based dashboards for Admins, Pentesters and Stakeholders.
 - Developed a **Go** REST API backend with **PostgreSQL** and **React** frontend; implemented secure asymmetric key-based authentication.
 - Integrated **AI-assisted** remediation guidance to accelerate vulnerability triage and developer response.
- Eyes on the Network — Packet Sniffing & Analysis Tool**2024
- Designed and developed a network packet sniffing tool using **Python** and **Scapy** on **Kali Linux** to capture and analyze live network traffic.
 - Parsed packet headers, payloads, and protocol fields across multiple network layers to identify anomalies, misconfigurations, and potential threat vectors.

CERTIFICATIONS & TRAINING

- Foundations of Cybersecurity**2023
- Google / Coursera
- Cybersecurity Job Simulation**2024
- Mastercard — Forage
- Cybersecurity Analyst Job Simulation**2024
- Tata Group — Forage
- Introduction to Cybersecurity**2023
- ICT Academy

ACHIEVEMENTS & RECOGNITION

- Secured **3rd place as a team** in Hackathon X CTF conducted by the **National Cyber Security Research Council** — demonstrated skills in web exploitation, network forensics, and vulnerability analysis under competitive conditions.

EDUCATION

- Bachelor of Technology (B.Tech) — Computer Science & Engineering (Cybersecurity)**Exp. May 2026
- Hyderabad Institute of Technology and Management
